

VUPPALADHADIUM SAI SAMARTH SAKETH

+91-7207300329 | saketh0329@gmail.com | Kadapa, Andhra Pradesh, India | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

To enhance and achieve the objectives of the organization through disciplined, organized, and progressive ways with sincerity, creativity, hard work, and smart work — bringing full dedication and best efforts to every task entrusted to me.

WORK EXPERIENCE

eMudhra Limited – Junior Software Developer

Bengaluru, India (On-site)

Promoted from Intern Trainee (Sep 2024) to Full-Time (June 2025)

Sep 2024 – Present

- Contribute to real-time production projects using **C#, ASP.NET MVC, Razor Pages, Blazor, and Web API**, delivering features across enterprise web applications.
- Built and deployed internal tools that automated manual workflows, collaborating with cross-functional teams in an agile environment.
- Implemented RESTful Web APIs and Blazor components, improving application modularity and accelerating frontend delivery cycles.
- Demonstrated rapid skill acquisition, earning a full-time offer within 9 months through consistent performance and independent module delivery.

Exposys Data Labs – Software Development Intern

Remote

Jun 2024 – Aug 2024

- Engineered a **Blog App with PDF export**, a dynamic **Burger Builder website** with real-time UI updates, and a **DDoS Packet Monitor** for detecting abnormal network traffic.

Bharat Intern – Web Development Intern

Remote

Mar 2024 – Apr 2024

- Delivered a **Money Tracker** with analytics dashboard, a **Blog App** with authentication and commenting, and a **Registration Form** with integrated analytics for onboarding workflows.

EDUCATION

Sri Chandrasekhara Saraswati Viswa Maha Vidyalaya (SCSVMV University)

Kancheepuram, TN

Bachelor of Engineering – Computer Science and Engineering (BE CSE) | GPA: 8.51 / 10.0

Aug 2021 – May 2025

PROJECTS

Dermal Lesion Delineation | Python, CNN, TensorFlow/Keras, Image Segmentation

Major Project

- Trained a **CNN model** for precision segmentation and classification of dermal lesions from medical images, applying data augmentation to improve model generalization across diverse datasets.

30DaysofDevFusion | JavaScript, React, Python, HTML/CSS, Full-Stack

Personal Project

- Completed a self-directed 30-day challenge building **30+ web applications**, publishing all on GitHub to demonstrate consistency, self-motivation, and full-stack breadth.

TECHNICAL SKILLS

Languages: C#, Python, JavaScript (ES6+), HTML5, CSS3

Frameworks & Tools: ASP.NET MVC, Razor Pages, Blazor, Web API, REST APIs, Git, GitHub

Cloud & AI/ML: Microsoft Azure (Fundamentals), CNN, Image Segmentation, Prompt Engineering

Soft Skills: Problem-Solving, Team Collaboration, Leadership, Communication
